Team Pass Task 4.5: Website Bootstrapping

Team: chatnow-a

For this task we hosted our website on Heroku cloud provider using their free-tier package. Heroku account is linked up to our group repository and gets deployed whenever there is change in repository, hence reflecting the most current repository at any given time. The URL for our website is <https://chatnow-a.herokuapp.com/#>

Automatically deploys from `master`

Automatic deploys from `master` are enabled

Every push to `master` will deploy a new version of this app. **Deploys happen automatically:** be sure that this branch in GitHub is always in a deployable state and any tests have passed before you push. [Learn more.](#)

☐ Wait for CI to pass before deploy

Only enable this option if you have a Continuous Integration service configured on your repo.

Disable Automatic Deploys

Deploy a GitHub branch

This will deploy the current state of the branch you specify below. [Learn more.](#)
